# Smooth and effective operation TX Trolley System

TX Trolley System takes care of your whole internal logistic flow from inbound to outbound. TX Trolley System provides you with a high capacity every day operation without bottlenecks and with convenient, ergonomic handling for your staff.

We are proud of our sturdy and reliable product, that will function around the clock, year after year, without costly production stops and with a minimum of maintenance.

The system is very flexible and we can provide custom made solutions spanning from the small manual warehouse to fully automatic multi level solutions.

Perfect for multi level solutions...

...or the small warehouse

Our manual solutions run smoothly...

Arrival and departure buffer.

## TX Trolley System

- Proven system - since 1976
- Stable and sturdy - no production stops
- Low investment
- Controlled flow of goods
- Gentle handling of your products
- Ergonomic
- Endless stock rails - efficient handling
- Handling with trolley trains - high capacity
- Minimum of maintenance

...through your entire logistic flow

Loading - straight into the truck without any lifting.

The pusher dogs pick trolleys automatically, one by one, from the row of accumulating trolleys.

## Conveyor TX 2000...

## Conveyor TX 2000

- High capacity system solutions
- Minimum staff requirements
- Automatic steering to destinations
- Clean - no grease or dirt problems
- Low noise emission with silent drive chain
- Adjustable level of automation
- Easily applied to various product ranges
- Automatic buffering
- Convenient connection to different levels and buildings

The mezzanine floors multiply the floor space and the conveyor is the link between the different levels.

## ...for semi- or fully automatic handling

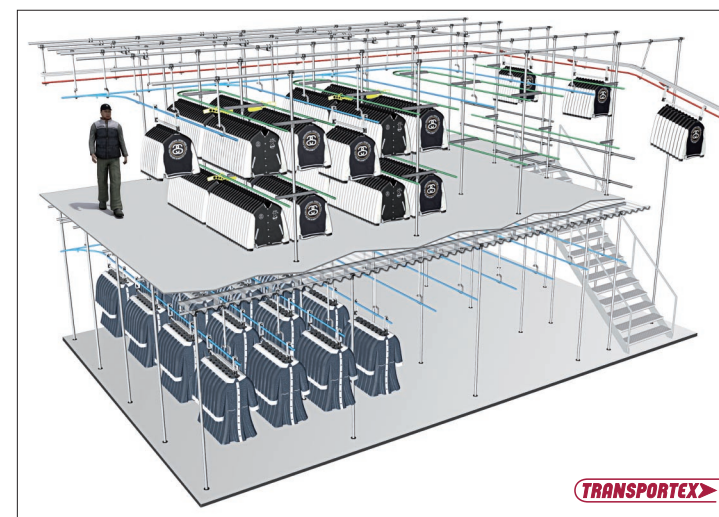

From the speed rails many trolleys can be pushed into the conveyor at the same time, which results in effective feeding.

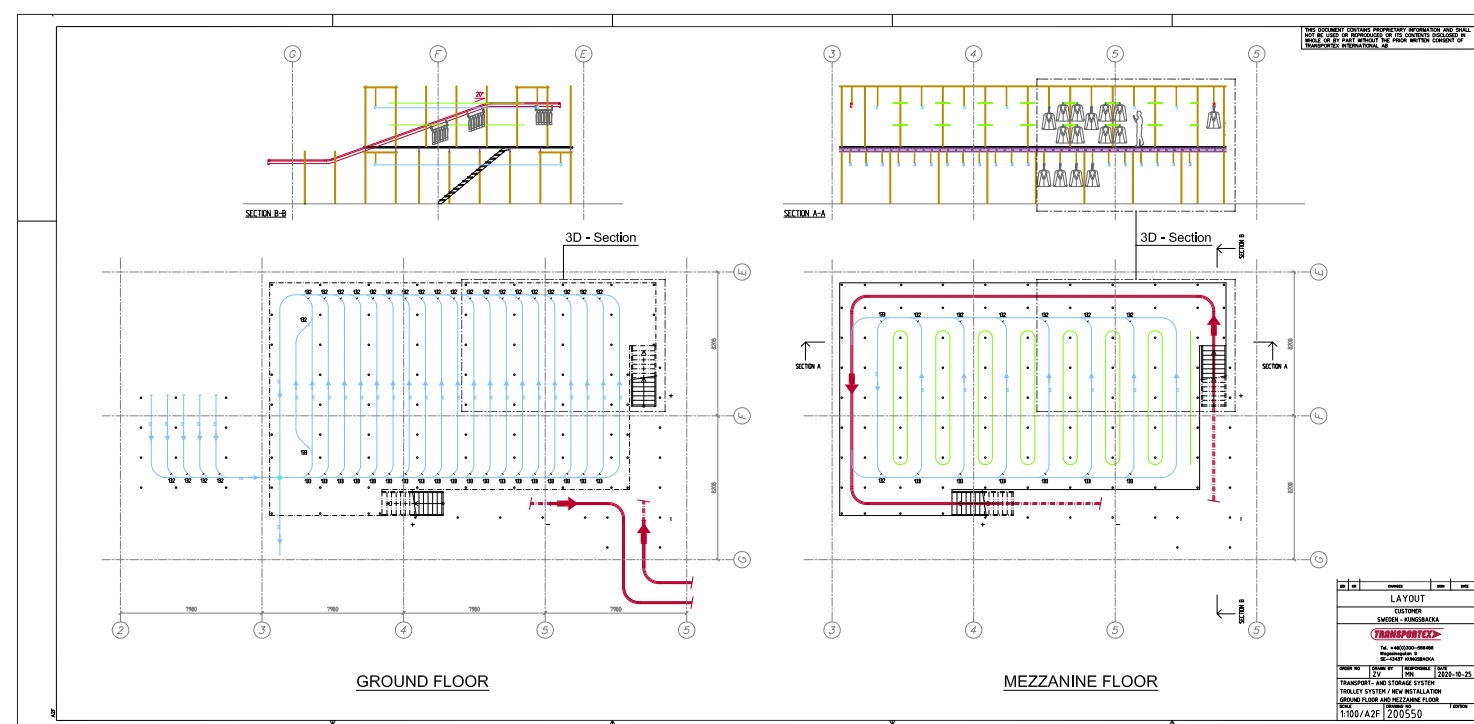

## Our way of working

- We optimize your production flow
- Unique solutions for each customer
- Long term business relations
- Project teams with experienced project leaders, constructors and erectors
- Close co-operation with customer throughout the entire project
- Our solutions are built for the future - simple to change and extend

## From idea to running operation...

## ...with custom made solutions

**Transportex International AB** has supplied warehouse solutions for hanging goods since 1976. We added flat storage and shop fittings into our range during 2002.

Our head office with production and warehouse is situated in Kungälv, Sweden. In 2001 we established production facilities and a service organisation in Lage/Lippe, Germany.

Our main objective is always an optimized operation for our customers, therefore we always build custom made solutions to achieve the best possible flow. Flexibility, reliability and long term relations are important key words for us at Transportex.
